

# Erratum

## Erratum: Breton et al., Phase Coherent Currents Underlying Neocortical Seizure-Like State Transitions

In the article “Phase Coherent Currents Underlying Neocortical Seizure-Like State Transitions,” by Vanessa Breton, Berj Bardakjian, and Peter Carlen, which was published online on [March 7, 2019](#), there were errors within the axes in [Figures 3a3](#), [9a1](#), [9a2](#), and [12A](#). The authors note that the errors “do not affect the final conclusions drawn, nor any of the calculations made.”

In [Figure 3a3](#), the horizontal axis should read 0 to 180.

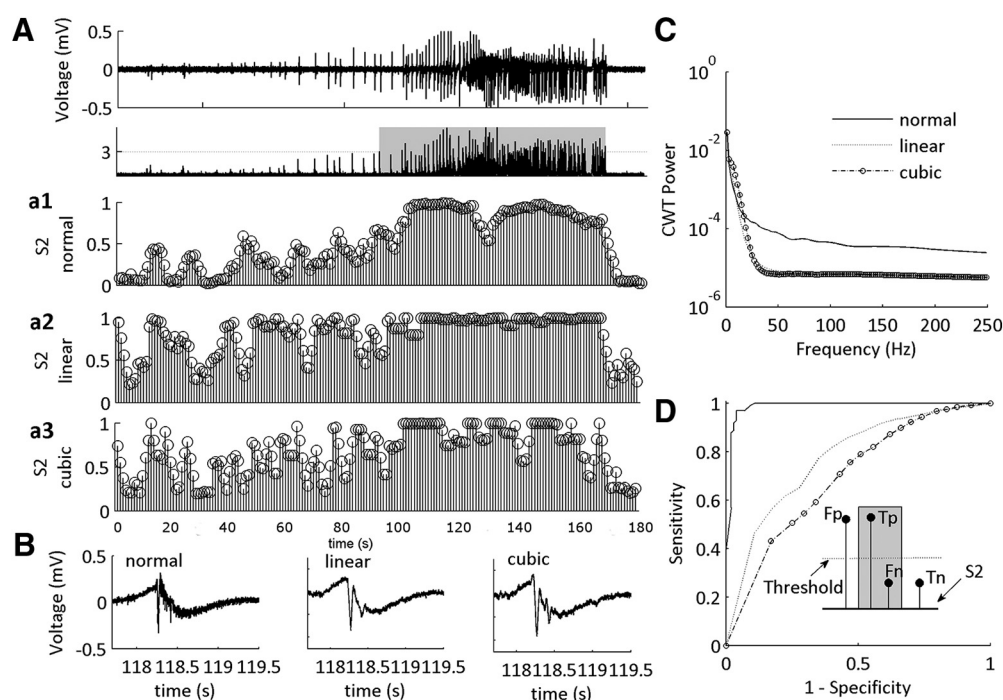

In [Figure 9a1](#), pseudocolor plot should read, “Frequency of Amplitude Signal (Hz)” on the vertical axis and “Frequency of Phase Signal (Hz)” on the horizontal axis.

In [Figure 9a2](#), the horizontal axis of the top graph should read 118 to 120.

In [Figure 12A](#), the label “140” at the end of the horizontal axis should be removed.

The article has been corrected online.
