

A

B

**Extended Data 2-2. CapTouch 1.0 Inter-interaction interval.** A, Histogram of time between object interactions for capacitive sensing (mean= $13.9 \pm 2.7$ s) and manual scoring ( $17.3 \pm 1.7$ s) for the CapTouch 1.0 experiment ( $p > 0.05$ , Moody test). B, Violin plot of inter-interaction intervals for capacitive sensing and manual scoring for the CapTouch 1.0 experiments.
