

Checklist for Stage 2 Registered Report Submissions Complete details can be found in Preparing Your Manuscript.

must be numbered) or multiple files: a manuscript file in Word, WordPerfect, Postscript, RTF, LaTeX, or Text format and each figure in a separate TIFF (300 dpi) or EPS file. Source data files essential to the work are included. Individual files must always be used for multimedia (MP4). The authors, title and abstract on the submission form must match those in the separate title page and article files. The article file should not include a title page. Preferred reviewing editor(s) must be specified on the submission form. Excluded reviewing editors may also be included. Preferred and excluded reviewers may be specified on the submission form. Cover letter: States the page numbers in the manuscript listing the URLs to the approved Stage 1 protocol and the study data and materials. Confirms that no data for any pre-registered study procedures were collected prior to in principle acceptance, and that for any secondary registrations, no pre-registered analyses were conducted prior to in principle acceptance. Text: No information that would identify any of the authors is present. Sections appear in the following order: Abstract, Significance Statement, Introduction, Materials and Methods, Results, Discussion, References, Figure/Table Legends, Figures, and Tables. All pages are double spaced and numbered. No broken URLs are present in the text. No reference to supplemental material appears in the text, figures, or tables. Separate Title Page Includes: Title (50 words maximum). Abbreviated title (50 characters maximum). Abbreviated title (50 characters maximum). Abbreviated title (50 characters maximum). Abraes and affiliations of each author. Acknowledgements. Under oritiputions. Corresponding author's name and email address. Number of figures, tables, and multimedia (separately). Word count is <250. Species studied is identified in abstract (or title). No subheadings are present. Word count is <550. More count is <550. Separate or individuals (with full affiliations) from which unusual materials were obtained		The submission may be either a single PDF file containing all text and figures (pages and figures		
 Source data files essential to the work are included. Individual files must always be used for multimedia (.MP4). The authors, title and abstract on the submission form must match those in the separate title page and article files. The article file should not include a title page. Abstract: Word count is ≤250. Species studied is identified in abstract (or title). No subheadings are present. Significance Statement: Word count is ≤120. Introduction: Word count is ≤750. Materials and Methods: Sex of subjects is stated (male, female, or of either sex). Companies or individuals (with full affiliations) from which unusual materials were obtained are provided. 				
 Corresponding author's name and email address. Number of figures, tables, and multimedia (separately). Number of words for Abstract, Introduction, and Discussion (separately, including any citations). Funding sources. Conflicts of interest (if applicable). Acknowledgements. 		Statistical table is included. All methodological descriptions that were prepared in future tense at Stage 1 have been converted to past tense.		
	Result	s:		
		Detailed information on each analysis performed is included with specific <i>p</i> values. The outcomes of confirmatory pre-registered analyses are, in all cases, clearly distingiushed from the outcomes of any additional unregistered analyses.		
	Discus	sion:		
		Word count is ≤3,000.		
	Citatio			
		Proper citation style for <i>eNeuro</i> is used.		
		A reference is provided for each in-text citation, and <i>vice versa</i> .		
Figures and Multimedia:				
	Ğ	Each illustration is numbered (separate numbering for figures and multimedia).		
		Each illustration has a legend and is mentioned in the manuscript.		
		All symbols are defined in the caption.		
	Tables:			
		Each table is numbered and mentioned in the manuscript.		
		Table contains no color or graphics.		
		A legend and title are provided for each table.		
License to Publish Form				
	availab	the electronic <u>License to Publish form</u> once the manuscript is submitted. A link to the form will be le on the home page of <u>eneuro.msubmit.net</u> for each author, if the corresponding author does not all authors.
